Would you like to learn how to grow vegetables?

MSU Extension now has a completely online, self-paced, introductory course on Smart Gardening with Vegetables. Learn how you can contribute to the Smart Gardening principles of creating healthy soils and plants, while enjoying the health benefits of growing and eating fresh produce.

In this course, MSU Extension Consumer Horticulture educators, Rebecca Krans and Sarah Rautio, cover gardening from start to finish with 6 lessons:

- Site Selection & Creating Healthy Soil
- Planning & Selecting Vegetables
- Seeds & Transplants
- Raised Beds & Container Gardening
- Integrated Pest Management
- Other Gardening Activities & Composting

Many resources are available to download onto your own computer. Participants work at their own pace and have 90 days to complete the course.

After successful completion and 80% proficiency, participants receive a certificate of completion. For MSU Extension Master Gardeners, this series qualifies for seven hours of Extension Master Gardener educational credits.

MICHIGAN STATE
UNIVERSITY | **Extension**

Michigan State University Extension Programs and materials are open to all without regard to race, color, national origin, gender, gender identity, religion, age, height, weight, disability, political beliefs, sexual orientation, marital status, family status or veteran status.
